## Installazione flussi node-red

cd /home/ubuntu/.node-red

curl -O <a href="https://git.smartme.io/alessio.cosenza/giomi-flows/raw/docker/settings.js">https://git.smartme.io/alessio.cosenza/giomi-flows/raw/docker/settings.js</a>

curl -O <a href="https://git.smartme.io/alessio.cosenza/giomi-flows/raw/docker/package.json">https://git.smartme.io/alessio.cosenza/giomi-flows/raw/docker/package.json</a>

curl -o flows\_cred.json https://git.smartme.io/alessio.cosenza/giomi-flows/raw/docker/manage\_sensor\_data\_cred.json

curl -o flows.json <a href="https://git.smartme.io/alessio.cosenza/giomi-flows/raw/docker/manage\_sensor\_data.json">https://git.smartme.io/alessio.cosenza/giomi-flows/raw/docker/manage\_sensor\_data.json</a>

npm install

Riavviare il servizio node-red:

systemctl restart node-red
